DIRECTOR, ENGINEERING

Your fulfillment.

Our Total Commitment.

Find Yourself Here.

Temple University Hospital's Episcopal Campus has provided quality care to its neighborhoods and its people for generations. We never lose sight of our vital importance to our communities. And we never forget our responsibility to a great staff that makes it all possible.

In this integral role, the selected candidate will develop and administer programs to maintain buildings, grounds and equipment. Be prepared to maintain associated buildings relative to heat, light, power, air conditioning and other broad environmental factors as well as direct the repair, reconstruction, construction and project management of the hospital's physical plant and its contents. This position will also offer the opportunity to administer a preventative maintenance program to facilitate uninterrupted service to patients and to ensure safe conditions for staff.

Our qualifications include:

- Comprehensive knowledge of federal, state and local regulations and codes; and of requirements of regulatory and accreditation agencies
- Five to seven years of progressive experience in Facilities Management and Engineering
- Candidates with an additional three years of experience at Assistant Direct level preferred
- Previous experience working in a union environment
- Working knowledge of the Joint Commission required regulations and National Fire Protection Association Standards related to hospitals
- CHFM Certification

We are seeking an exceptionally skilled Director who will be responsible for leading the day-to-day activities of our team in delivering optimized workplace environments and a safe and productive environment of care.

- Ensures that all facilities are operated/maintained in a cost-effective, energy efficient and safe condition in accordance with the approved budget, contract and regulatory requirements.
- Directs team to ensure continuous regulatory compliance with NFPA101 Life Safety Code, SOC/PFI/ILSM/ICRA, Fire Safety Management and Utilities Management.
- Tracks, analyzes and reports performance metrics for safety, quality, regulatory, productivity, cost and customer satisfaction. Implements corrective action plans for positive change.
- Accurately and timely reports of assigned projects through operational and financial systems reporting.
- Reviews construction plans, designs, and specifications pertaining to projects.

- Assumes responsibility for the maintenance of the physical plant, implements plan and design changes to critical electric and mechanical infrastructure.

We offer a competitive salary and excellent benefits including tuition assistance for you and your dependents.
